A person who buys any commodity for a consideration which has been paid or promised or partly paid and partly promised or under any system of deferred payment is a consumer. The present study focus on young consumers (15-24 years). The consumers are usually unwilling to make complaints about the goods bought by them or the services rendered to them if the sum of money involved is not large. There is violation of the rights of the consumers due to lack of proper publicity. Rights, duties and privileges of consumers are neglected and taken casually. This study is designed to be helpful for the consumer to know their basic rights and duties. It will also be helpful in enhancing deeper studies into other aspect of consumer issues. The study intends to expose the necessity of consumer awareness to have a more flexible approach to deal with the challenges of the present day world. Another aspect for this study is to awake the consumers to rise to the occasion and assert their rights as consumers without forgetting their duties and responsibilities. This study is undertaken to be a stepping stone for
the youth to be aware of the consumer activities prevailing in the day to day world.

This book is a complete guide for Consumer Awareness & Empowerment, enumerating the potency of the Consumer Disputes Redressal Setup and its hassle free functioning, to inexpensively provide justice, with speed. The book includes A to Z of the provisions of the Consumer Protection Act and its elaboration, in common man's language, along with issues that confront the consumer, settled law on these issues and Do's & Don'ts for him, while dealing with the traders or the service providers. The book is invaluable for students of law, budding lawyers and non-judicial members of the Consumer Fora."

This book discusses the ideas, interventions (by different players) and technological revolutions that have transformed the telecom industry to propel it towards a growth cycle. Pursuing a comprehensive approach, it examines highly topical issues in depth, e.g. mobile data security via 4G, the new industrial revolution, green telecommunications, and consumer awareness of radio signals. Along with input from regulators, government organizations and industry players, expert opinion columns in each chapter clearly present the viewpoints of the industry and ministry. Several graphical tools are used throughout the book, helping readers to contemplate the text in different ways and to make concepts more hands-on.” Readers will also gain a holistic perspective of the industry (key players, regulatory bodies and the consumer) and a clearer understanding of various policy issues and their implementation mechanisms, business dynamics and technology issues in this sector.

This book is a comprehensive digest of country's progress in different fields. It deals with all aspects of development—from rural to urban, industry to infrastructure, science and technology, art and culture, economy, health, defence, education and mass communication. The sections on general knowledge, current affairs, sports and important events are a must read for comprehensive understanding of these fields. with its authenticity of facts and data, the book is a treasure for students, researchers and academicians.

In Indian context.

Chapter wise and Topic wise introduction to enable quick revision. Coverage of latest typologies of questions as per the Board latest Specimen papers Mind Maps to unlock the imagination and come up with new ideas. Concept videos to make learning simple. Latest Solved Paper with Topper’s Answers Previous Years’ Board Examination Questions and Marking scheme Answers with detailed explanation to facilitate exam-oriented preparation. Examiners comments & Answering Tips to aid in exam preparation. Includes Topics found Difficult & Suggestions for students. Dynamic QR code to keep the students updated for 2021 Exam paper or any further CISCE notifications/circulars

It is widely agreed that, over the past decade, accelerating infrastructure investments in India’s North Eastern Region (NER) and neighboring countries, along with connectivity agreements with Bangladesh, hold immense promise for unlocking NER’s economic potential. Other global trends, such as the growing incomes and consumer awareness in India and neighboring
countries; a rising preference for fresh, healthy, safe, environmentally friendly, and socially responsible products; the growing role of services in manufacturing; and increasing demand for skilled resources are also very favorable for NER. Together, these developments can help NER showcase its strengths in agriculture and services, thereby developing value chains in these sectors, which will lead to sustainable, better-paying job opportunities for the people of NER. In this context, the World Bank, in consultation with stakeholders--government, private sector, and academia--analyzed two cross-cutting constraints that are encountered across all value chains and sectors in NER: connectivity and logistics, and product standards and quality infrastructure. To ground the policy in specific contexts, the team studied four sectors in depth: fruits and vegetables, spices, bamboo and related products, and medical tourism. Playing to Strengths lays out an initial policy framework for NER that integrates demand and supply and shows that, even with a low base in manufacturing, NER can leverage its strengths in agriculture and services to step up its growth. However, implementing this framework will require a different approach to doing business compared with the existing ecosystem and its associated value chains, which are mostly geared to local and/or price-conscious consumers. In capitalizing on its advantages, NER will not only accelerate its own development, but also will play an increasingly critical role in the government of India's "Act East" policy.

In today's time there is no more dynamic and fascinating field to either practise or study than branding, promotion and advertising. But in today's growing environment this field is undergoing dramatic changes that are changing advertising and promotion forever. The changes are coming from all sides—clients demanding better results from their advertising and promotional money; lean but highly creative smaller advertising agencies; sales promotion and direct-marketing firms, as well as interactive agencies, which want a larger share of the billions of dollars companies spend each year promoting their brands and services; consumers who no longer respond to traditional forms of advertising; and new methods that may reinvent the very process of advertising. This book is an attempt to include all these and many more similar topics related to branding and advertising in a pragmatic and simple way.

- Strictly as per the Semester-2 syllabus for Board 2022 Exams (March-April)
- Includes Questions of the both -Objective & Subjective Types Questions
- Chapterwise and Topicwise Revision Notes for in-depth study
- Modified & Empowered Mind Maps & Mnemonics for quick learning
- Unit wise Self-Assessment Tests
- Concept videos for blended learning
- Previous Years' Board Examination Questions and Marking scheme Answers with detailed explanation to facilitate exam-oriented preparation
- Examiners comments & Answering Tips to aid in exam preparation
- Includes Topics found Difficult & Suggestions for students
- Includes Academically important Questions (AI)
- Dynamic QR code to keep the students updated for 2022 Exam paper or any further ICSE notifications/circulars

Consumer awareness of the purchasing of safe and eco-friendly apparel products is on the rise. Knowledge of the restricted substances helps the industry navigate often complex product safety and chemical management requirements in order to address consumer preferences in the apparel supply chain. There is no doubt that risk analysis of the product at appropriate stage eliminates the possibilities of existence of restricted substances by adopting a right safety compliance policy. Thus, different safety aspects of apparel and its related requirements shall be covered in Product safety and restricted substances in apparel. Potential sources of restricted substances, chemicals of concern, and the scope of implementation for a proper testing program will also be discussed. Different standards to comply with legal regulations associated with the chemical management of restricted substances will be included in this book.
Contributed articles; with special reference to Mizoram, India.

The syllabus has tried to link the academic curriculum with real life and, thus, dwelled on connecting the students' understanding with the real world around them.

In the developing country like India, measures for consumer protection are very much required. The illiteracy and ignorance of the majority of consumers both in the rural and urban areas provide opportunities for business communities to follow unfair trade practices. These have to be curtailed through various measures of the Government and other non-Governmental organisations. Of the various legal remedies available, the principle legal protection is the Consumer Protection Act, 1986. Under this Act, the consumer gets opportunities to entrust his grievances through the consumer forums organised at the District, State and National levels and other voluntary consumer organisations. The Consumer awareness, protection and preservation of consumer rights and well analyzed in this book.

Customer is king. With rising consumer awareness and cut-throat competition, it is important to provide services which are differentiable and memorable for the consumer. With a ring side view to customer service, Debashis Sarkar—author, thought leader, and practitioner, who has held leadership positions with Unilever, Coca Cola, ICICI Bank, and now Standard Chartered—shares valuable observations about customer service excellence. How Can I Help You? hands you the strategies and tactics to retain and nurture your customers by laying down the five major pitfalls to be sidestepped while dealing with customer service. Richly illustrated with case studies and examples, this book is an essential read for every modern professional.

The consumer protection policy creates an environment whereby the clients and customers receive satisfaction from the delivery of goods and services needed by them. One of the disquieting features of the Indian democracy, even after 67 years of Independence, is that an average Indian consumer continues to be in a pitiable condition due to poverty, illiteracy, ignorance and general apathy. Adulterated food, spurious medicines, and sub-standard domestic appliances are pushed over the counter with ease. Glossy and unethical advertisements appear in the print and electronic media. Ironically, it all happens in a country where, in ancient India, Kautilya in his epoch making Arthasashtra had advocated for fixing of responsibility on the State for safeguarding the interests of the consumers. When it became imperative to protect the consumers from adulterated, sub-standard goods and deficient services and also to provide relief by way of compensation, the Consumer Protection Act was enacted in the year 1986. This Act was enacted with the objective to provide better protection to the consumers against the fraudulent practices of suppliers. The Act provides for effective
safeguards for consumers against various types of exploitations and unfair dealings, relying on mainly compensatory rather than punitive or preventive approach. The present work explains and examines the rights of the consumers and the protective measures adopted in India and other countries. It specifically deals with the statutory measures for redressal of consumer grievances provided under the Indian Consumer Protection Act, 1986.

Master's Thesis from the year 2017 in the subject Computer Science - IT-Security, University of Applied Sciences Graz, language: English, abstract: The vision of internet of things (IoT) has become a reality and in recent years, it has seen rapid growth. However, there is a lot more to come from this technological Tsunami. In simple terms, Internet of Things is a network of interconnected objects or things with sensors, collecting data and making actionable decisions. With the arrival and adaptation of this technology, many questions regarding cyber security are raised. This master thesis examines the consumer perspective on key elements of the internet of things. The elements in focus are consumer awareness, the perception of privacy and perception of value. The relationship of these elements with Gender and Nationality is investigated. The study is based on the survey of respondents belonging to Austria and India. After interviewing two experts from the field of the internet of things and reviewing the literature, the vulnerabilities surrounding IoT were confirmed. Lack of consumer awareness is considered a hindrance in the adaptation of IoT, whereas the trust between technology and consumers has decreased over time. It is claimed that consumers do not value security enough to pay extra for it. However, the findings from this study suggest a shift in the understanding and attitude of the consumer base. The author finds while certain trends from previous researchers remain unchanged. There has been an increased awareness among consumers overall. Gender influences the awareness; value perception of consumers is also influenced by Gender and Nationality. The perception of privacy is negative and the trust of consumers remains low. Most people would like to see more work done by the industry and the government to increase consumer education regarding cybersecurity and Internet of Things.

Financial inclusion has been one of the most propagated ideologies in countries, and as a result, significant efforts have been taken to nurture institutions and systems to include an array of socio-economic classes. Various financial institutions and societies have taken steps toward financial inclusion, but to be successful, they need to understand how to accurately target and market their potential customers as well as the new avenues for development. Marketing Techniques for Financial Inclusion and Development is a critical scholarly resource on the marketing techniques adopted by various financial institutions and societies for promoting financial inclusion initiatives for the development of the society at large. Featuring coverage on a broad range of topics such as consumer awareness, financial literacy, and micro-enterprises, this book is geared towards managers, investors, brokers, researchers, and all others within the banking industry.
India is one of the emerging markets that pose a unique set of challenges to marketers. The importance of the context and the usefulness of concepts in the Indian context is the core proposition of the book. The diversity of a mix of factors such as cultural aspects, lifestyles, demographics and unbranded offerings make consumer behaviour a fascinating study. This book focuses on the behavioural principles of marketing and its application to branding in the Indian context. * Consumer behaviour concepts associated with branding * A combination of recent and traditional examples reflecting the application of behavioural concepts * Touch of reality boxes to indicate context-based examples * Caselets and cases drawn from real-life situations * Research findings associated with the Indian context * Topical issues in consumer behaviour like cultural aspects, digital marketing and experiential branding

Consumer protection has become the topic of debate at all levels. The reason behind this has been the lack of awareness of consumers and the malpractices of the business world. In order to maximize profits, many businessmen exploit consumers by supplying poor quality goods at higher prices. They adopt unfair trade practices such as adulteration, boarding, black-marketing, etc. As a result, consumers do not get value for their money. Big business houses use their power for private gain and to the detriment of consumers. Consumers are exposed to physical, environmental and other hazards. They need to be protected from spurious, duplicate and adulterated products, pollution of air, water and noise, and misleading advertising. Consumer protection, however, is only possible if two steps are taken. First is to frame rules, legislations and set up machinery like courts to assure that laws are implemented in their true spirits. Second is to make the stakeholders aware of such laws so that they might defend themselves when required. Keeping these two steps in mind, this study has been undertaken. It covers the evaluation of consumer protection machinery and assesses the level of awareness of consumers in Himachal Pradesh. A brief outline of the thesis is as below. Chapter - I deals with the introduction to consumer protection. It discusses the meaning of consumer, consumer protection, and consumerisms. It also discusses the consumer's rights, needs, and consumer's responsibilities. Chapter - II reviews the literature concerning the problem at hand. It also presents a picture of research design formulated for the present research work. It discusses the selection of the problem, importance, scope, objectives, hypotheses and research methodology of the present study. Finally, the limitations and the future scope of study have been shown. Chapter - III discusses consumerism and consumer protection movements at the international and national level. Chapter - IV is an attempt to examine various legislations for consumer protection at the international level as well at the national level in India. Chapter - V reviews the frameworks for consumer dispute resolution and redress in India. Chapter - VI examines the organizational setup for the consumer protection along with its evaluation in Himachal Pradesh. Chapter - VII deals with the analyses of opinion and perception about consumer awareness and consumer alertness with regard to consumer protection. Chapter - VIII highlights the summary and major findings of the study. It also explains suggestions to improve the implementation of consumer protection laws and awareness among people.
